

# TCEQ Interoffice Memorandum

---

**To:** Tony Walker  
Director, TCEQ Region 4, Dallas/Fort Worth  
Alyssa Taylor  
Special Assistant to the Regional Director, TCEQ Region 4, Dallas/Fort Worth

**From:** Shannon Ethridge, M.S., D.A.B.T. *SE*  
Toxicology Division, Office of the Executive Director

**Date:** May 2, 2014

**Subject:** Toxicological Evaluation of Results from an Ambient Air Sample for Volatile Organic Compounds Collected Downwind of the Premier Natural Resources II, LLC, Rice Ranch Pad (Latitude 33.064444, Longitude -97.144482) in Bartonville, Denton County, Texas

Sample Collected on February 24, 2014, Request Number 1403002 (Lab Sample 1403002-001)

---

## Key Points

- Reported concentrations of target volatile organic compounds (VOCs) were either not detected or were detected below levels of short-term health and/or welfare concern.

## Background

On February 24, 2014, a Texas Commission on Environmental Quality (TCEQ) Region 4 air investigator collected a 30-minute canister sample (Lab Sample 1403002-001) downwind of the Premier Natural Resources II, LLC, Rice Ranch Pad (Latitude 33.064444, Longitude -97.144482) in Bartonville, Denton County, Texas. The sample was collected as a follow-up to a previous investigation. The investigator did not experience odors or health effects while sampling. Meteorological conditions measured at the site or nearest stationary ambient air monitoring site indicated that the ambient temperature was 49.5°F with a relative humidity of 66%, and winds were from the north (5°) at 0.5 to 4.5 miles per hour. The sampling site was approximately 101 to 300 feet from the possible emission source (compressor). The nearest location where the public could have access was approximately 301 to 500 feet from the possible emission source. The sample was sent to the TCEQ laboratory in Austin, Texas, and analyzed for a range of VOCs. The list of the target analytes that were evaluated in this review are provided in Attachment A. The VOC concentrations were reported in parts per billion by volume (ppbv) (Attachment B and Table 1). Please note that the available canister technology and analysis method cannot capture and/or analyze for all chemicals.

## **Results and Evaluation**

Reported VOC concentrations were compared to TCEQ's short-term health- and/or welfare-based air monitoring comparison values (AMCVs) (Table 1). Short-term AMCVs are guidelines used to evaluate ambient concentrations of a chemical in air and to determine its potential to result in adverse health effects, adverse vegetative effects, or odors. Health AMCVs are set to provide a margin of safety and are set well below levels at which adverse health effects are reported in the scientific literature. If a chemical concentration in ambient air is less than its comparison value, no adverse health effects are expected to occur. If a chemical concentration exceeds its comparison value it does not necessarily mean that adverse effects will occur, but rather that further evaluation is warranted.

All of the 84 VOCs were either not detected or were detected below their respective short-term AMCVs. Exposure to levels of VOCs measured in this sample would not be expected to cause short-term adverse health effects, adverse vegetative effects, or odors.

Please call me at (512) 239-1822 if you have any questions regarding this evaluation.

## Attachment A

### List of Target Analytes for Canister Samples

ethane	4-methyl-1-pentene	t-1,3-dichloropropylene
ethylene	1,1-dichloroethane	1,1,2-trichloroethane
acetylene	cyclopentane	2,3,4-trimethylpentane
propane	2,3-dimethylbutane	toluene
propylene	2-methylpentane	2-methylheptane
dichlorodifluoromethane	3-methylpentane	3-methylheptane
methyl chloride	2-methyl-1-pentene + 1-hexene	1,2-dibromoethane
isobutane	n-hexane	n-octane
vinyl chloride	chloroform	tetrachloroethylene
1-butene	t-2-hexene	chlorobenzene
1,3-butadiene	c-2-hexene	ethylbenzene
n-butane	1,2-dichloroethane	m & p-xylene
t-2-butene	methylcyclopentane	styrene
bromomethane	2,4-dimethylpentane	1,1,2,2-tetrachloroethane
c-2-butene	1,1,1-trichloroethane	o-xylene
3-methyl-1-butene	benzene	n-nonane
isopentane	carbon tetrachloride	isopropylbenzene
trichlorofluoromethane	cyclohexane	n-propylbenzene
1-pentene	2-methylhexane	m-ethyltoluene
n-pentane	2,3-dimethylpentane	p-ethyltoluene
isoprene	3-methylhexane	1,3,5-trimethylbenzene
t-2-pentene	1,2-dichloropropane	o-ethyltoluene
1,1-dichloroethylene	trichloroethylene	1,2,4-trimethylbenzene
c-2-pentene	2,2,4-trimethylpentane	n-decane
methylene chloride	2-chloropentane	1,2,3-trimethylbenzene
2-methyl-2-butene	n-heptane	m-diethylbenzene
2,2-dimethylbutane	c-1,3-dichloropropylene	p-diethylbenzene
cyclopentene	methylcyclohexane	n-undecane

## Attachment B

3/20/2014

### Laboratory Analysis Results

Request Number: 1403002

Request Lead:

Region: T04

Date Received: 3/3/2014

Project(s): Barnett Shale

Facility(ies) Sampled	City	County	Facility Type
Premier Natural Resources II, LLC.	Bartonville	Denton	

#### Sample(s) Received

Field ID Number: N1084-022414

Laboratory Sample Number: 1403002-001

Sampled by: Robin Pugh

Sampling Site:

Date & Time Sampled: 02/24/14 12:55:00 Valid Sample: Yes

Comments: Canister N1084 was used to collect a 30-minute downwind sample using OFC-027. Sample failed leak check in the field prior to analysis. Per customer request, the data was qualified.

#### Requested Laboratory Procedure(s):

Analysis: AP001VOC

Determination of VOC Canisters by GC/MS Using Modified Method TO-15

Please note that this analytical technique is not capable of measuring all compounds which might have adverse health effects. For questions on the analytical procedures please contact the laboratory manager at (512) 239-1716. For an update on the health effects evaluation of these data, please contact the Toxicology Division at (512) 239-1795.

Analyst: Jaydeep Patel

### Laboratory Analysis Results

Request Number: 1403002

Analysis Code: AP001VOC

#### Qualifier Notes:

ND - not detected  
NQ - concentration can not be quantified due to possible interferences or coelutions.  
SDL - Sample Detection Limit (Limit of Detection adjusted for dilutions).  
SQL - Sample Quantitation Limit (Limit of Quantitation adjusted for dilution).  
INV - Invalid.  
J - Reported concentration is below SDL.  
L - Reported concentration is at or above the SDL and is below the lower limit of quantitation.  
E - Reported concentration exceeds the upper limit of instrument calibration.  
M - Result modified from previous result.  
T - Data was not confirmed by a confirmational analysis. Compound and/or results is tentatively identified.  
F - Established acceptance criteria was not met due to factors outside the laboratory's control.  
H - Not all associated hold time specifications were met. Data may be biased.  
C - Sample received with a missing or broken custody seal.  
R - Sample received with a missing or incomplete chain of custody.  
I - Sample received without a legible unique identifier.  
G - Sample received in an improper container.  
U - Sample received with insufficient sample volume.  
W - Sample received with insufficient preservation.

Quality control notes for AP001VOC samples.

D1-Sample concentration was calculated using a dilution factor of 4.

X - Pre-sampling canister leak check did not meet acceptance criteria.

\*A simple asphyxiant displaces air, lowering the partial pressure of oxygen and causing hypoxia at sufficiently high concentrations.  
 ppbv - Parts per billion by volume.

ND - Not detected.

NQ - Concentration can not be quantified due to possible interferences or coelutions.

SDL - Sample Detection Limit (Limit of Detection adjusted for dilution).

SQL – Sample Quantitation Limit (Limit of Quantitation adjusted for dilution).

INV - Invalid.

J - Reported concentration is below SDL.

L - Reported concentration is at or above the SDL and is below the lower limit of quantitation.

E - Reported concentration exceeds the upper limit of instrument calibration.

M - Result modified from previous result.

T - Data was not confirmed by a confirmational analysis. Data is tentatively identified.

F - Established acceptance criteria were not met due to factors outside the laboratory's control.

H – Not all associated hold time specifications were met. Data may be biased.

C - Sample received with a missing or broken custody seal.

R - Sample received with a missing or incomplete chain of custody.

I - Sample received without a legible unique identifier.

Tony Walker et al.

May 2, 2014

Page 12 of 14

G - Sample received in an improper container.

U - Sample received with insufficient sample volume.

W - Sample received with insufficient preservation.

D1 - Sample concentration was calculated using a dilution factor of 4.

X - Pre-sampling canister leak check did not meet acceptance criteria.

**Table 2. TCEQ Long-Term Air Monitoring Comparison Values (AMCVs)**

**Please Note:** The long-term AMCVs are provided for informational purposes only because it is scientifically inappropriate to compare short-term monitored values to the long-term AMCV.

Compound	Long-Term Health AMCV (ppb <sub>v</sub> )	Compound	Long-Term Health AMCV (ppb <sub>v</sub> )
1,1,1-Trichloroethane	940	Cyclopentane	120
1,1,2,2-Tetrachloroethane	1	Cyclopentene	290
1,1,2-Trichloroethane	10	Dichlorodifluoromethane	1,000
